

Alejandro Alcaraz González

Sint-Pietersvliet 12, 2000 Antwerpen Belgium
+0470895200 | aleexalcaraz@gmail.com

I am open to new work opportunities. Ability to develop relationships with partners, work collaboratively and take initiative to resolve problems and propose innovative solutions to achieve organizational objectives.

EXPERIENCE

Cool projects I have made

Skills & Tools: C#, Java, Android, Node

- I developed an Artificial Intelligence agent in C# which was able to learn by itself. The agent needed to find the gold on a maze in the minimum number of steps possible, after a lot of iterations it was able to do it very fast and intelligently.
- I created a query suggester using node, express and jquery, where you can type queries then the system was auto suggesting you options of tables and columns based on your database information. The results were displayed in tables using bootstrap.
- I co-founded an app called ParkyMx. It gathers a lot of parking lots in my city and tells the users where they can park and all available spots. We are using maps apis and in a future payment options. Look it up on parky.mx

Softtek - Server Engineer - Mexico

Jan 2018 – May 2018

Skills & Tools: Windows Server, Linux, VM, Network tools

- I monitored and gave support to GE turbines all around the globe. I was able to connect to a turbine computer remotely and then fix issues and problems they had. We used troubleshoot and network tools to resolve cases.

PearlChain - Software Engineer - Belgium

Sep 2018 - present

Skills & Tools: Java, Hibernate, React, Redux, SQL, Jira, Git, SCRUM

- I developed a new way of auditing entities on the company's product using hibernate envers. With this I reduced the audit process time and the amount of code by a 90%.
- After 6 months I was selected as one of the few programmers doing full stack development using spring and react.
- Currently I am on the the team in charge of the core of our product developing new tasks and improvements as well as fixing bugs and errors that the client might have.

EDUCATION

Universidad Panamericana Campus Aguascalientes

Bachelor in Artificial Intelligence engineering and post graduated with a specialty in mobile apps Development.

- GPA: 8/10

ADDITIONAL SKILLS

- Proficient in Java, C# and Javascript
- Databases: Sql, Mysql and Firebase
- I am very excited to learn devops like docker and kubernetes.
